

# THINK BIGGER

## STARDROPS JAN 16 - 22, 2022

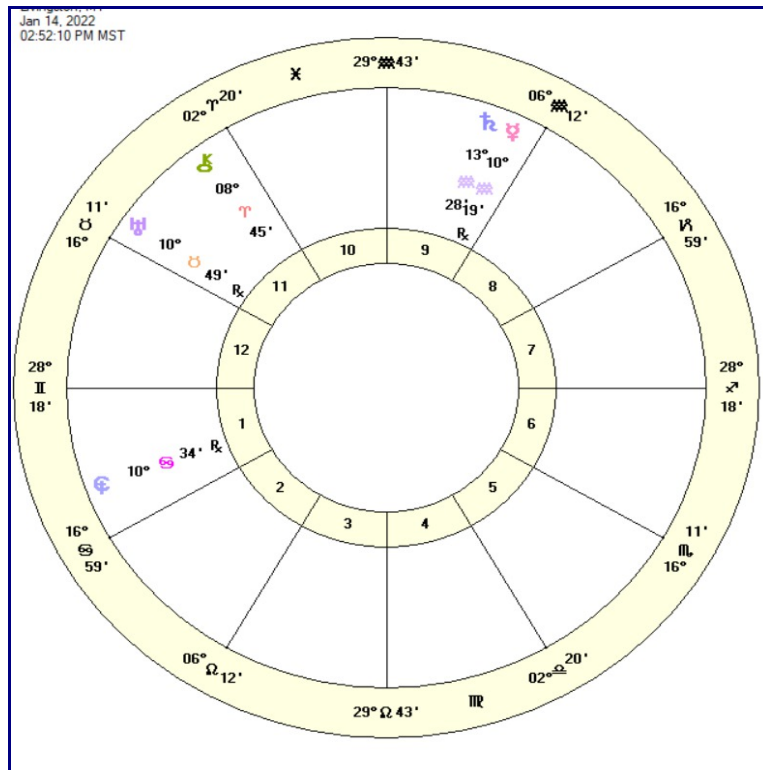

The science that tells us, humanity's brains and DNA are not utilizing their full magnificent potential is truly limiting and putting the challenge out there, how can we change this and be, more. Why certain DNA *letters* are not accessed, leads us this year, to a daring experiment.

*“A new study suggests that only 8.2 percent of [human DNA](#), or about 250 million of these so-called DNA letters, are functional, and more than 2 billion are not. “ [Source](#)*

A grand experiment opens up for us, to love our life and the world so much, we pull off something that might seem virtually impossible. By utilizing the new Mercury retrograde in the alchemical sign of Aquarius, for a 2022 challenge, our life and all humanity's opportunity to turn everything that matters around, is our destination.

**Let's begin!**

## Mercury retro at 10° Aquarius

Mercury Retro Jan 14, 2022

### Mercury Retro's Personal Message:

The electricity is always high when we enter a Mercury retro period and along with that power, comes a desire to experience something better. Mercury super charges the atmosphere with impulses to reject oppression and stagnation.

We want freedom, we want to change our restrictive life into something glorious. Deep inside, a penetration of inspiration is taking over the thoughts and moods of humanity. Massive Transformation is the theme of 2022. This electric charge floods the world with stimulating ideas, meetings, organizing strategic plans, launching new endeavors which not only benefit the individual, but communities.

It's about independence and implementing an advanced way of living and will launch innovation in every activity.

Excitement to create and build an incredible 2022, with moral ethical integrity, honesty and transparency at its foundation will occur.

Personally, watch how it plays out in your own world. This cycle of Mercury retro can assist you with your life situation. Because of the inconjunct to Hades (see chart above) and the conjunction to Saturn in Aquarius, we have a ;problem to solve first, however.

To overcome at least one restriction, one challenging thing, maybe a responsibility you have to yourself which has been getting in your way for too long, needs to change.

It's time to shift out of that mindset, that limitation because Mercury wants you to fix the situation and become more free.

Hades inconjunct Mercury tells us, there might be for some, a haunting restrictive shadow that only Hades brings, just on the periphery of our thoughts throughout the day. This issue, tends to find a way to taint our energy, even subconsciously, influencing ever so slightly, our moods.

Let's take care of that thing...it could be our number one goal in this year of transformation.

Are there projects you desire to realize this year? Are you longing for something special, but have held yourself back for whatever reason?

Bringing something special to life is highly likely to occur this year, and it begins now. Is it a concept, a feeling or vision you want to share with others or simply realize certain important goals in order to achieve a happier life.

The staying power of this Mercury as it first activates Aquarius occurs because of its trine to the transiting North Node in Gemini, **January 2<sup>nd</sup>** and again as it reverts to Capricorn and trines the changing North node from Gemini to Taurus in the week of **January 20 - 28<sup>th</sup>**. this strength of Mercury, brings to us a promise of unified consciousness (one mind) with other like-minded individuals and communities everywhere. This is really important for our alchemical experiment in 2022.

Streams of higher inspirations flow into our minds, enhancing productive plans, bringing an increase of confidence and coordination necessary to launch a new life for the earth and of course, fulfilling your own personal needs.

These powers of Mercury streams, help us to receive higher forms of information. Mercury in these aspects release powers and frequencies which change our environment, building crystalline structures and matrices of light, which is always the start of realizing something in our physical world. These powers of Mercury, ideas and plans, will be unmovable, impenetrable.

Mercury invites you to engage in an alchemical experiment this year with tremendous potential to transform our world.

**This insight released into your mind, would be something beautiful you would commit to, throughout the entire 2022**

It might start with your creative idea - but leads from one thing to another. Ultimately bringing us to a grand finality in December 2022, which would result in the successful completion of an entire string of concepts - a finished product - and it all began with one small Mercury retrograde in Aquarius, January 2022.

What is driving this one Mercury to help us with our 2022 year goal? Just the fact it is in that multi-dimensional humanitarian sign Aquarius is enough, but it also trines to the North Node in Gemini (early January) and sextiles the Chiron in Aries.

The Node acts like a doorway and all we need to do is walk through that door and we're in another plane of existence. It is a thrust into our future potential, and because Mercury is the natural planet ruling Gemini, doors open for all of us regarding innovative creative ideas, planning a series of steps to bring all of us to a higher more positive place personally by December 2022.

## More planetary movements

**Uranus moves direct Jan 18** Beginning this day, the planet of sudden unexpected change gains momentum to intensify revolutionary dramatic events. Expect very rapid acceleration to begin among all activities, positive and negative. Both will step up and clash, yet the constructive activities will push back the negative ones. This Uranus will come to a hard square to the Mercury retro turn direct, on February 24, which could be a trigger.

From February 20 - 24, 2022, Uranus direct can intensify chaos and an even greater oppositional tension breaks loose.

This Uranus will be unbridled energies flooding into all areas of humanity, full on from this time up to its next retro period, occurring on August 24, 2022 when Uranus will once again turn retrograde, and slightly calm down.

### **The North Node leaves Gemini and enters Taurus Jan 18, 2022**

As the socially trending Node which represents not only the themes and narratives of the population but also finances moves into the material sign of Taurus, now through July 17, 2023.

Re-building society, economy and all things people need in order to thrive.

**February and March, this North Node will trine Pluto in Capricorn and eventually conjoin Uranus also in Taurus,** The revolution begins to penetrate every aspect of life,

changing our world into a better place. It desires to build, to engineer. This energy is instigating financial institution transformation, businesses, medical, our bodies needs, and Taurus rules ownership over our lives where Capricorn order implements the blueprints to lay down new foundations.

## **Personally it will help you engineer your days and months to precipitate your goals.**

**Jan 19 Sun at 29\* Capricorn trine North Node at 29\* Taurus**

With the Sun also joining Pluto and trine this North Node, your empowerment, impacts your life with reasonable inspirations.

**January 22 - 23 Mercury conjoins Sun in Aquarius 3 degrees**

Special days for extra mental stamina- excellent for documents, paperwork, contracts, meetings and strategic discussions. Beautiful time for the truth to come out. Impersonal and objective sharing of facts, helpful suggestions for solutions and plans are strong on these days. Every little bit opens doors for your amazing progress this year.

**Venus Retro sextile Neptune January 5 - February 24 2022**

We can't forget our magical Venus, softening our personal relationships, our love and our desire to connect, reach out and offer love to others (and receive).

As it sextiles Neptune, this layers our meditation with a special quality likened to an ethereal healing energy. It increases our contemplation upon our values in life with a philanthropic empathetic love. Inspired designs, artistic creations, musical activities, helpful people assisting us in accomplishing something challenging, that otherwise might not have happened, is so helpful throughout this period.

## Synopsis

The wrap up of this period, is to remember to not only plan out your magnificent goals for 2022, but add onto this list, what you want the world to be like, and think big.

Trust events which might have forced a shift, an unexpected change, as that situation probably would not have supported where the Universe knows you belong. This is definitely a time of trust.

**Elaborate.** Realize, we are building (Taurus) a new world, through a systematic (Pluto and Venus in Capricorn) application of our mental (Mercury retros) concentration, discipline and responsibility, requiring focus along with our heart's love (Venus) throughout 2022, we can personally and globally achieve something so great by December 2022, but it takes a repetitive practice of love and mental focus, along with steps to take. Mercury will help you lay it all out. We will compare notes as each Mercury retro occurs throughout the year. It will work, you'll see!
